DETAILED ACTION

1. Claims 1-2 have been examined.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,654,726 to Joe J. Hanzek.
3. As per claim 1, Hanzek clearly discloses a manufacturing status indicating system, comprising a host system for turning data to database and for placing the data under control and storing data, said data being related to ordered products as inputted by an order receiving control system, a manufacture control system, and a process control system; and a server for preparing pages to indicate information to be offered to a purchaser based on said database (See Hanzek abstract, column 3, lines 9-18, 32-42, column 3, line 61-column 4, line 10, column 7, lines 46-53, column 9, lines 3-16 and lines 28-34, and column 12, lines 54-68).
4. As per claim 2, Hanzek clearly discloses a manufacturing status indicating system according to claim 1, wherein said server is provided with authorization function to recognize an authorization key, and, when access is made from the browser device by using the authorization key, the server generates an information to be offered to a browser device as a home page based on elements contained in the authorization key (See Hanzek abstract, column 3, lines 9-18, 32-42, column 3, line 61-column 4, line 10, column 7, lines 46-53, column 9, lines 3-16 and lines 28-34, and column 12, lines 54-68).
